Profile:

I am a Javascript developer who focuses on modern front end tools such as React and Webpack. I consistently apply design systems, accessibility best practices, and serverless technology to make sure my products are fast, scalable, and can be used by anyone. I currently offer my services to non-profit projects in an effort to grow my skills and make a difference in the world at large.

Projects

10thWorldServers: A SaaS product that pulls data in using Azure Functions into a GatsbyJS front end.

Pug Sports: Marketing page for a mobile application designed to connect people who wish to play pick up games of their chosen sport.

IP-Address-Tracker: Making use of leaflet and a geolocation API users can use the search bar feature to reveal information about an ip address or domain name.

SKILLS

CSS
JavaScript
ReactJS
REST API's
NodeJS
MongoDB
SQL

Previous Work Experience

Connective Realities August 2020 - Present
Connective Realities is an education focused web app that brings people together for academic discourse. Currently in the development phase. I work on this app as a front end developer using React to create dynamic user interfaces using data from a backend built with the Flask framework.

Mentalogue July 2020 - Present
Mentalogue is an organization that seeks to create greater access to mental health services in Malaysia. I'm primarily responsible for maintaining and updating their Wordpress website. I use CSS, custom templates, and create custom themes for various aspects of their website.

Comfort and Floyd 2017-2018
Consulted with owners and built a responsive website for their restaurant which increased their visibility and presence in their area.

Education

Penn LPS Coding Bootcamp, Philadelphia — *Certificate*
June 2019 - September 2019

Rigorous training in the latest technologies used in the field such as React, NodeJS, MongoDB, and others. Collaborated with other students on projects and other assignments, gained a reputation as a valued member of the class.

Temple University, Philadelphia, PA — Sociology
August 2011 - May 2013
